'Eat frequent but small meals'

For students awaiting their board exams, every minute away from their textbooks might seem like time wasted. However, apart from preparing their mind, they need to strengthen their

bodies by consuming the right food, says Dr Nupur Krishnan, clinical nutritionist

and director of biologic healthcare while speaking to Priya Ramakrishnan on the diet students should follow during the exams.

exam fever '09

What role does eating right play in a student's life during exam season?

During exams, students spend long hours studying and staying awake. Intake of the right food in small quantities

will keep them stimulated and alert. If a student has a heavy lunch of oily food, he will be unable to study immediately. Some foods induce sleep, while others keep you energised, so it is of utmost importance to avoid certain food during exams.

Are there food items that improve memory and concentration?

Almonds, walnuts, pumpkin and sunflower seeds, cucumber and watermelon will help in improving memory and concentration. It is not necessary to soak almonds overnight.

What diet should they stick to during exams?

It is advisable for students to have small and frequent meals. Parents
